

## Office Memorandum

UNITED STATES GOVERNMENT

TO : Chief, OC-E

DATE: 11/18/58

FROM : Chief, OC-T

TTT-M- 118

SUBJECT: Electronic 

50X1

REF : TTT-M-054

1. A visit was made to the R&D Laboratory on 17 November 1958 by  and myself to view the progress being made on the electronic . It was very gratifying to see the approach which is being taken. We have every hope of it being a very useful piece of equipment.

50X1

50X1

2. A suggestion for considering the RAKE or similar systems was made in paragraph 2 of the reference. In discussion with the R&D engineers working on the electronic  it became apparent that they were unfamiliar in detail with RAKE. It is requested that the attached MIT Technical Memoranda be forwarded to  R&D Laboratory for perusal by his engineers.
